International Mineral Processing Equipment

Precision MP Slurry Pumps
Capacity: 3.5 – 6,500 m³/h
Heads: 2.4 – 235 meters
Efficiency: to 82%

intMPE Slurry Pumps are heavy and robust centrifugal pumps capable of handling tough and abrasive duties. The pumps - horizontal, vertical and submersible are designed to give excellent performance, low energy consumption, long wear life and easy maintenance.

Precision MP Slurry Pump
Parts to fit other Pumps

intMPE Reverse Engineered Slurry Pump parts are designed to be interchangeable with most Competitor's Pumps. All ASTM materials are available & produced to ISO-9001 Standards.

International Mineral Processing Equipment

Precision MP Split Case
Capacity: 90 – 13,000 m³/h
Heads: 5 – 250 meters

intMPE Advanced Design: Double suction impellers are adapted to minimize radial force with excellent hydraulics that have high efficiency. The smooth inner surface of the casings minimizes wear.

Precision MP Vertical Turbine
Capacity: 50 – 15,000 m³/h
Heads: 25 – 365 meters

intMPE Advanced Design: Multi-stage single entry pumps for pumping clean, slightly contaminated/abrasive raw, clean, mineral, sea, process, mine and cooling water.

FOUNDRY CAPABILITIES

NIHARD 4 . . . *ASTM A532 Class I Type D Chemical Analysis requirements. Has highest strength and greatest resistance to impact of all the "Nihard" family.

ULTRA-CHROMIUM IRON (36% HCR) . . . *High-Chromium Iron similar to ASTM A532, Class III, Type "A". A low carbon alloy containing additional molybdenum for 700-750BH. Better corrosion resistance than Nihard alloys is achieved.

CORROSION/EROSION AND HEAT RESISTANT ALLOYS . . . *CA-6NM, CD-4MCU, CF-8M(316), CF-3M(316L), CN-7M, HC, HH, HK, 410, 440C, MONEL, INCONEL, 17-4 PH.
